OUR STORY

Ryan Lucas, founder of Limitless Van, spent years managing high-end custom millwork projects, using SolidWorks to engineer complex environments with exacting precision. Outside of work, he explored the mountains—running trails or taking long dirt bike trips.

After watching friends end their days inside warm, well-designed vans while he slept in a tent, it clicked: if he combined his design-build background with his love of adventure, he could create a better kind of van—one that was **beautiful, intelligently engineered, and built to last**.

That vision became reality when he began building his own van. When he needed two small metal brackets fabricated, he approached his employer for a simple favor and was met with a question that changed everything:

“Sure, but why stop at one van? Why not build 100 more?”

That moment turned a personal project into a business, and Limitless Van was born.

Today, our small, highly skilled team builds each van to the standards we’d expect for our own families. We focus on **premium materials, reliable systems, and craftsmanship that holds up to years of real use**. We work closely with every client to understand how they travel and what they value, ensuring each van feels **intuitive and purpose-built**.

WHAT IT'S LIKE TO WORK WITH US

1

DISCOVERY CALL (OPTIONAL, 15 MINUTES)

Not ready for a full consultation? Schedule a 15-minute Discovery Call to ask questions, get to know us, and see if a Limitless Van is right for you.

2

INTRODUCTORY CALL (~1 HOUR)

Considering a Limitless Van? Chat one-on-one with our founder, Ryan, to discuss your travel style, layout ideas, priorities, and budget. He'll help you evaluate options and make informed decisions.

After the call, you'll receive a **detailed estimate** tailored to your build.

3

RESERVE YOUR SPOT

Once you're ready to move forward, a **non-refundable \$1,500 deposit** is applied toward your final build balance and secures your place on our production schedule.

4

DESIGN & SPECIFICATIONS

About three months before your build begins, we'll meet in person or over Zoom to plan every aspect of your conversion. We'll finalize the floor plan, review components, and select colors and finishes that match your style and travel needs.

After this meeting, you'll receive an updated estimate based on your final selections, and our team will begin preparing **3D renders** that bring your layout and design to life.

5

FINAL DESIGN SIGN-OFF

Once your 3D renders are complete, we'll meet for a final review before production begins. We'll walk through the full design, confirm all components, and make any last adjustments.

After you approve the plan, we'll finalize project paperwork and invoice the 50% build payment. From there, our team begins ordering materials and preparing for production.

WHAT IT'S LIKE TO WORK WITH US (CONT.)

6

PRODUCTION

You'll drop off your van at our shop, and our team will get to work bringing your custom conversion to life.

Our production timeline typically ranges from 14 – 20 weeks. Throughout the build, we'll share progress photos and updates so you can see your van take shape. A few weeks before completion, we'll send the final invoice and coordinate details for your pickup.

7

DELIVERY & ORIENTATION

When your van is complete, you'll meet us at our shop where our team will guide you through every feature, system, and technology.

We'll make sure you feel confident with your new adventure vehicle before you head out on your first journey.

8

ONGOING SUPPORT

Your relationship with Limitless Van doesn't end at delivery. Every van comes with a three-year / 36,000 mile warranty. We're also always available to assist with third-party warranties and discuss future upgrades, so you can get the most out of your van for years to come.

With our intentionally small team, you'll always speak with a real person who knows your build. From your first conversation to life on the road, we're here to support you and keep your van performing at its best.

IS A LIMITLESS VAN RIGHT FOR YOU?

PAGE 06

A Limitless Van is a great fit if you:

- ✓ Want a reliable, adventure-ready van that performs off-grid without compromise.
- ✓ Appreciate craftsmanship and precision, from cabinetry and materials to electrical engineering and system integration.
- ✓ Are ready to invest in a professionally built, high-end van designed for long-term reliability and quality you can feel.
- ✓ Seek a van that is functional and intuitive, while still offering a clean, refined aesthetic.
- ✓ Enjoy working closely with a small team that listens, guides, and brings your vision to life.

If these priorities match yours, a Limitless Van may be a great fit.

CHOOSE YOUR LAYOUT

Every Limitless Van begins with a thoughtfully designed foundation. Some clients choose one of our established layouts—Juniper or Gifford—complete builds that offer a refined starting point with flexibility to customize finishes, components, and upgrades. Others draw inspiration from past builds or pursue a fully custom layout.

Whichever path you choose, each van is tailored to how you travel, live, and use your space.

Three ways to start your build:

Proven Layouts: Juniper & Gifford

Start with one of our established layouts, then tailor finishes, systems, and upgrades to match how you travel.

- ✓ Juniper: Transit 148" / Sprinter 144"
- ✓ Gifford: Transit 148" EXT / Sprinter 170"

[Juniper → Page 08](#)
[Gifford → Page 09](#)

Inspired by Past Builds

If a past Limitless build caught your eye, we can use it as a starting point and adapt the details to fit your priorities.

- ✓ Start with a build you already love
- ✓ Adjust layout, features, and finishes

[Explore Completed Builds](#)

Fully Custom Layouts

For needs outside our established layouts, we offer fully custom builds designed around your gear, routines, and must-haves.

- ✓ Built around how you live and travel
- ✓ Ideal for specialized requirements

JUNIPER

Versatile, efficient, and ready for life on or off the grid

Sleeps/Seats: 2-4 • **Platforms:** Sprinter 144" + Transit 148"

Key features include:

- ✓ Full kitchen galley with induction cooktop, sink, refrigerator, and optional microwave
- ✓ Convertible lounge bed with Murphy capability
- ✓ Rear spray-off shower with optional hide-away interior shower
- ✓ Pull-out toilet
- ✓ "Flex space" behind the driver's seat, with options for a two-passenger seat/bed, upholstered bench, dinette, standing desk, or combination of options using L-track.

From there, Juniper becomes a personalized build, with finish selections, components, and upgrades tailored to your travel style and priorities.

For a full breakdown of features and options, visit limitlessvan.com/juniper

GIFFORD

More space, more amenities, designed for longer trips

Sleeps/Seats: 2-4 • **Platforms:** Sprinter 170" + Transit 148" Extended

Key features include:

- ✓ Extended kitchen galley with induction cooktop, sink, refrigerator, optional microwave / air-fryer / convection combo, and expanded storage
- ✓ Convertible lounge bed with Murphy capability
- ✓ Fully enclosed interior shower and toilet
- ✓ "Flex space" behind the driver's seat, with options for a two-passenger seat/bed, upholstered bench, dinette, standing desk, or combination of options using L-track.

Like all Limitless layouts, Gifford starts with a proven base package and can be customized through finishes, systems, and upgrades to match how you travel and live.

For a full breakdown of features and options, visit limitlessvan.com/gifford

ELECTRICAL & POWER SYSTEM

ENGINEERED FOR REAL OFF-GRID LIVING

A reliable, intuitive power system is the foundation of every Limitless Van. That's why we partner with Artek, the industry leader in Victron electrical engineering, to design and integrate one of the most capable off-grid power platforms available today.

Our goal is simple: deliver serious off-grid capability without complexity, so your van just works, whether you're camping for a night or staying put for days at a time.

HIGH-DENSITY LITHIUM POWER

Every Limitless build starts with **Victron Smart Lithium NG batteries**, chosen for their exceptional energy density, safety, and reliability. These next-generation batteries deliver more usable power in less space—critical in a van where every inch matters.

They also feature advanced balancing, robust protection, and system communication that allows for accurate monitoring and long-term durability.

Our custom-built **Limitless Power Box** houses the entire electrical system in a compact, beautifully crafted enclosure. Designed and assembled in-house, it keeps wiring organized, airflow optimized, and components easily serviceable—without sacrificing valuable storage space.

ELECTRICAL & POWER CONT.

INTUITIVE CONTROL, ONE SCREEN

All major systems are controlled through **Artek's CORE platform**, built on Garmin's RV OEM digital-switching system. Everything is centralized into one clean, easy-to-use interface:

- ✓ Lighting & accessories
- ✓ Heating & A/C
- ✓ Water & plumbing
- ✓ Solar & shore power
- ✓ Battery health & system monitoring

The result is a single, intuitive control screen that's simple to operate—no guesswork required.

ULTRA-FAST CHARGING

Every Limitless Van is equipped with a high-performance charging system designed to replenish your batteries quickly and efficiently. A **Nations alternator paired with a Wakespeed regulator** restores battery capacity far faster than traditional van charging setups, allowing you to comfortably run power-hungry systems like air conditioning, cooking appliances, and refrigeration without constantly chasing hookups.

For additional flexibility, every van also includes:

- ✓ **Solar charging** for extended off-grid stays
- ✓ **Shore power** when you're plugged in
- ✓ **Optional high-idle and auto-start integration** for recharging without driving.

ENGINEERED SUPPORT & PEACE OF MIND

Every Limitless Van power system is professionally engineered, programmed, and optimized in partnership with Artek, whose team is known for deep technical expertise and responsive support when questions arise on the road.

Just as importantly, our team remains directly involved, providing hands-on guidance, real-world troubleshooting, and ongoing support from people who know your build inside and out.

CLIMATE & COMFORT

A truly capable adventure van needs to be comfortable in every season. Our climate and comfort systems are engineered to manage temperature, noise, and airflow—so your van feels just as livable in winter conditions as it does in summer heat.

INSULATION & SOUND CONTROL

We insulate our vans with 3M Thinsulate, a lightweight, moisture-resistant insulation commonly used in marine and automotive applications. It provides **excellent thermal performance without trapping moisture**, helping regulate interior temperature year-round.

To further improve comfort, we apply sound-deadening material to most raw metal surfaces, significantly reducing road noise and vibration for a quieter, calmer driving and living experience.

Our low-profile floor system is **100% waterproof** and includes built-in insulation while preserving interior headroom. For those with heated floors, we integrate the system with only a minimal increase in floor height ($\frac{1}{8}$ "), distributing warmth evenly without compromising space.

CLIMATE & COMFORT CONT.

HEATING & HOT WATER:

We use **Rixen's hydronic heating system**, an American-made solution known for reliability, efficiency, and excellent customer support. This integrated system adapts to changing conditions by drawing heat from multiple sources.

In addition to cabin heat, the system provides hot water and can circulate warmth to protect plumbing and engine components in freezing temperatures—making it well suited for true four-season travel.

AIR CONDITIONING & VENTILATION

For cooling, we install **Cruise N Comfort high-efficiency 48V air conditioning**, widely regarded as one of the highest-quality systems available. Made in the USA and seamlessly integrated into our control system, it delivers strong cooling with minimal power draw.

Every van includes a **MaxxAir fan** for active ventilation, with the option to add directional cabin fans for improved airflow throughout the interior.

KITCHEN & LIVING

A great van interior isn't just about how it looks, but how effortlessly it works. Our kitchen and living spaces are designed for daily use, intuitive flow, and long-term durability, with thoughtful details that make life on the road feel natural.

CUSTOM CABINETRY & STORAGE

This is where Limitless Van sets itself apart. Every cabinet is designed and built in-house, allowing us to tailor storage and functionality around how you live and travel.

We routinely incorporate personalized features such as:

- ✓ Pull-out pantries and trash systems
- ✓ Coffee cabinets built around your preferred machine
- ✓ Integrated cutting board storage and countertop extensions
- ✓ Interior cabinet mirrors, spice storage, and concealed storage solutions
- ✓ Custom niches for items like dog bowls, safes, or travel essentials

Cabinet doors are fitted with secure latches and momentary lighting that activates when opened—small details that make everyday use easier and more enjoyable.

KITCHEN & LIVING CONT.

PAGE 15

BUILT FOR REAL-WORLD DURABILITY

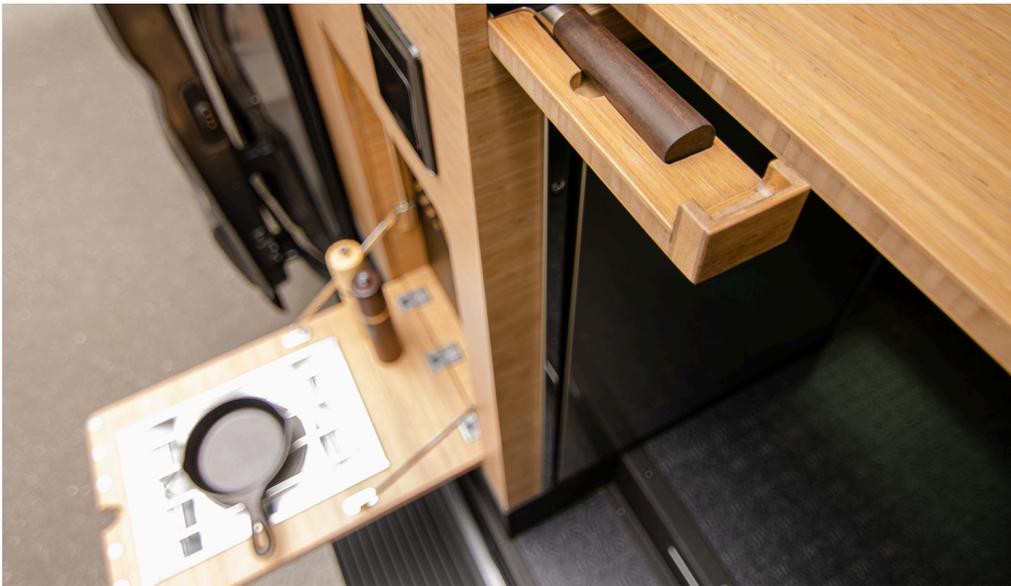

Our cabinetry isn't just beautiful—it's engineered to last. Upper cabinets are framed with thin-gauge cold-rolled steel for strength and clean lines, paired with ultra-lightweight wood panels to reduce overall weight. Lower cabinets use a combination of laminated Baltic birch and bamboo for durability and longevity.

All cabinetry is mounted to our proprietary aluminum infrastructure using rivnuts—not screws—ensuring everything is mechanically fastened, secure, and built to withstand years of travel and vibration.

FLEXIBLE COOKING OPTIONS

We offer multiple ways to cook comfortably, whether you're inside or outside the van:

- ✓ **Induction cooktops** for clean, efficient indoor cooking
- ✓ **Optional all-in-one air fryer, microwave, and convection oven** combo
- ✓ **Optional exterior cooking setups**, including a flip-down table with gas burner

PLUMBING & BATH

PAGE 16

Reliable water systems are essential for real off-grid travel. Our plumbing and bath solutions are designed for durability and ease of use, so you have water when you need it, without the complexity of traditional RV systems.

THOUGHTFUL WATER STORAGE & PROTECTION

Every Limitless Van is equipped with a **large stainless steel fresh water tank** with internal baffles to prevent slosh, distribute weight evenly, and improve on-road stability.

When equipped, the exterior-mounted **gray water tank** is freeze-protected through a stainless steel heat exchanger tied into the hydronic system, eliminating the need for power-hungry heating pads. An **electronically controlled dump valve** allows for easy, mess-free emptying from the main control panel.

CLEAN, FILTERED WATER

All vans include a **Guzzle H2O LED + carbon block filtration system**, providing clean, great-tasting water wherever your travels take you.

SHOWER OPTIONS

Every build includes a heated rear wash-down shower, perfect for rinsing off muddy bikes, sandy feet, or wet dogs.

For those who want indoor bathing, we offer two interior shower options:

- ✓ **Full wet bath shower**, with the option for a discreetly stowed, pull-out toilet
- ✓ **Fold-down TetraVan shower**, that preserves space without committing to a full bathroom

PRICING & INVESTMENT

A custom van is a significant investment, and transparency matters. While every build is tailored to the individual client, we provide clear investment ranges upfront, so you can move forward with confidence.

THE FOUNDATION OF EVERY LIMITLESS BUILD

Every build starts with a **complete, livable foundation** designed for real off-grid use. Even our most streamlined builds include:

- ✓ **Fully insulated + sound treated interior** with finished walls, flooring, lighting, and ventilation
- ✓ **Robust off-grid electrical system** (10kWh+) with solar, shore power, and ultra-fast alternator charging
- ✓ **Heating & hot water** systems designed for four-season use
- ✓ **Complete interior build** with cabinetry, kitchen galley, seating & sleeping solutions
- ✓ **Integrated water systems** with filtrations, fresh & gray water tanks, and an exterior shower
- ✓ **Exterior Upgrades** such as a roof rack, AT tires, suspension, and tire carrier

Many builders treat these systems as upgrades. **For us, they're the foundation.**

TYPICAL INVESTMENT RANGE

\$145,000 - \$275,000

(vehicle not included)

Final investment varies based on layout, system upgrades, level of customization, exterior components, and finish selections.

Detailed, build-specific pricing is provided after an introductory consultation to align scope, systems, and priorities.

WORDS FROM OUR CLIENTS

I'm so glad we chose Limitless Vans for our build. The quality and craftsmanship speaks for itself. They brought our vision to life better than we imagined!

- KANDIE M.

We had our van built out by Limitless in 2021 and were thrilled with the whole process. Ryan walked us through step by step to build something truly custom that met our needs.

- RYAN C.

From start to finish we had a fabulous experience at Limitless Van! They were incredibly helpful as we figured out what we wanted in the build and completely transparent throughout the entire process.

- LYNN P.

I can't say enough about the quality of their workmanship. The attention to every little detail is impressive, producing a clean-looking and functional end product.

- CHRIS W.

We couldn't be happier with the build process or the end result...we have no regrets. My wife and I give Limitless Van our highest recommendation.

- CHRIS F.

NEXT STEPS

If you've made it this far, you likely know whether a Limitless Van is a good fit. The next step is a conversation — and we offer two ways to connect.

OPTION 1: DISCOVERY CALL (15 MINUTES)

A short conversation to answer your initial questions and walk through our process.

What to expect:

- ✓ High-level guidance and answers to your questions
- ✓ An opportunity to decide if you'd like to move forward with a full consultation

Schedule a 15 Minute Discovery Call

OPTION 2: INTRODUCTORY CALL (~ 1 HOUR)

A focused, one-on-one call for those ready to explore a build in detail.

What to expect:

- ✓ Direction on layout and system options
- ✓ Clear next steps and build-specific estimate

Request an Introductory Call → info@limitlessvan.com
